SUMMARY

Computer Science student specializing in **software, data, and AI systems** with experience building **secure web applications, scalable data pipelines, and analytics platforms**. Proficient in **Java, Python, Microsoft Fabric, Azure**

EDUCATION

Louisiana State University (LSU), Baton Rouge, LA

Expected May 2028

Bachelor of Science in Computer Science (Software Engineering)

GPA: 4.17/4.3

Minors: Mathematics | Honors Research

Honors: National Stamps Scholar, President's Future Leaders in Research (PFLR), President's Honor Roll

Related Coursework: Advanced Data Structures and Algorithms, Discrete Structures, Numerical Methods, Computer Organization and Design, Differential Equations, Linear Algebra, Complex Variables

University College London Summer **2025** – Artificial Intelligence Concepts & Applications (Distinction)

EXPERIENCE

Student Researcher

March 2026 – Present

Pennington Biomedical Research Center – Imaging Department – Baton Rouge, LA

- Performed QC on 100+ brain MRI scans using FreeSurfer, detecting segmentation issues and data inconsistencies across large imaging datasets.
- Validated outputs from automated image-processing pipelines, improving dataset reliability for research analysis.
- Managed structured imaging metadata and research records to support efficient data workflows.

Software & Data Engineering Intern

September 2025 – June 2026

Automotive Data Analytics

- Developed **OTP authentication system** using **JavaScript, HTML, and Twilio** to enhance website security.
- Engineered and optimized data pipelines in **Microsoft Fabric** processing **10,000+ customer records**, enabling reliable multi-source analytics.
- Designed **Power BI dashboards** to visualize dealership performance via **Azure Logic Apps**.
- Expanded full-stack and data engineering skills through Microsoft courses on **SPAs, Fetch API, and Lakehouse Architecture**.

Student Government Senator

August 2025 – Present

Louisiana State University – Baton Rouge, LA

- Elected to represent the **College of Engineering** in LSU's Student Government.
- Serve on the **Student Auxiliary Services** and **Academic Affairs Committees**, contributing to initiatives that improve campus resources for students through technological advancements and **ethical AI** policies.

PROJECTS

Secure Authentication System | JavaScript, Twilio, Azure Logic Apps

- Built two-factor authentication system securing user login workflows
- Integrated SMS verification and session validation to prevent unauthorized access

Data Analytics Pipeline | Python, SQL, Microsoft Fabric

- Developed ETL pipelines processing 10K+ records from multi-source datasets
- Automated ingestion and reporting for real-time Power BI dashboards

SKILLS

Languages: Java, JavaScript, Python, HTML/CSS, SQL, C

Tools & Frameworks: Microsoft Fabric, Power BI, Visual Studio Code, Git, Azure Logic Apps, Twilio, FreeSurfer

Concepts: Object-Oriented Programming, Data Structures & Algorithms, Machine Learning Fundamentals, ETL Pipelines, Data Visualization

Spoken Languages: English and Arabic (Fluent), Spanish (Conversational)
